

Digit the Badger 7

The Easter Holidays had arrived and the gang from the badger group were planning to visit the hide, which had just opened again, after the winter.

The windows would need to be cleaned! The carpets would need to be brushed! The outside would need to be painted!

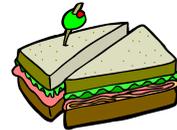

Oh, well. It had to be done, to

make it nice for visitors to come and see the badgers.

Of course, you can't clean and paint on an empty stomach. So the gang packed up some food to have whilst they were busy.

Each person would get 3 sandwiches, two bananas and a packet of oat biscuits.

The gang took 42 sandwiches.

How many packets of crisps did they need?

How many bananas did they take?

I love to eat fruit in the autumn. It's very good for me, as it gives me lots of energy!

You can often find out what I've been eating by looking for my dung pits. I leave these on the borders of my territory

How's this for a dung pit? This badger ate a wasp's nest! How mad is that?
