Tally and Tot-up 4

Bet you can't do these!

Mother badger needs to divide up the worms between the cubs for the family dinner.

(Badgers love to eat worms. Yuk!)

Can you help Mum?
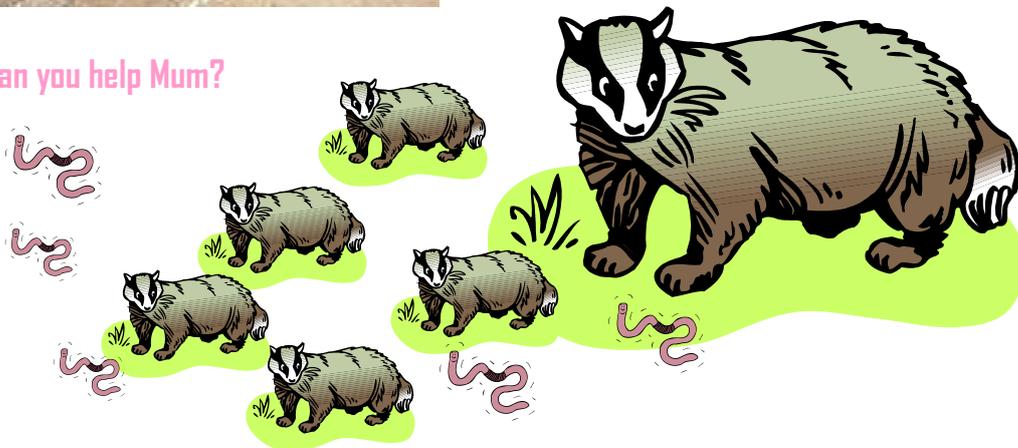

8 worms divided by 4 badgers = 2 worms each

So:
1. 12   divided by 2 = ...
2. 9   divided by 3 = ...
3. 15   divided by 5 = ...
4. 6   divided by 3 = ...
5. 50 divided by 10 = ...
6. 5 divided by 5 = ...
7. 12 divided by 4 = ...
8. 40 divided by 10 = ...
9. 10 divided by 5 = ...
10. 21 divided by 3 = ...

Did you get them right?
Well done!
