

# Badgery Science Fun 1

Look carefully at these berries. Berries contain seeds.  
 Why do you think that plants make seeds? .....

Can you think of a way in which badgers might help to spread the seeds? .....

.....

Sam tried an experiment.  
 of different colours in the

She hung some coloured beads  
 bushes in the garden.

Then she asked Pete to see  
 most easily.

which ones he could spot

These are Pete's results:

Colour of beads	Number spotted.
Red	20
Black	15
Blue	12
Yellow	14
Green	4
Orange	11

Which berries were the easiest to see?

.....  
 Which were hardest to see?

.....  
 Why were they hard to see? .....

.....

How do you think the colour of the berries affects the number spread by the badgers?

.....

*Badgers love elderberries. They also like to sharpen their claws on elder trees. You can often find elder growing near to badger setts.*
