

# Badgery Science Fun 19

Some things that we find on this planet are living things. Some are not. Some were once alive, but are not alive now.

Put an A in the box of anything that is alive, an O in the box of something that was once alive, and an N in the box of anything that has never been alive.

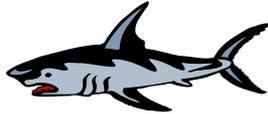

Badger  
A

Stone N  
building

Bird  
A

Wooden  
stool  
O

Aluminium  
Can N

Tree A

Cotton  
shirt O

Shark  
A

Glass  
N

Dinosaur  
skeleton O

Can you think what

all living things have in common? What do they all do?

1. Things don't get around alone! **Move**

2. Aren't babies cute? **Reproduce**

3. We all need oxygen to **breathe**.

4 This badger has heard a noise. **Sense**

5. Badgers love to eat worms **Feed**

6. From a baby to a girl. **Grow**

7. This is a badger's dung pit! **Excrete!**

Think about it. We do all of these things. So does anything that's alive.
