

## Badgery Science Fun 2

Look at the pictures of animals.

Can you say what the fox and badger have in common? They are both **mammals**

They both have **fur**. The others don't.

The swan is **bird**. It is covered in **feathers**.

The adder is a **reptile**. It has **cold** blood.

The ladybird is an **insect**. It has **six** legs.

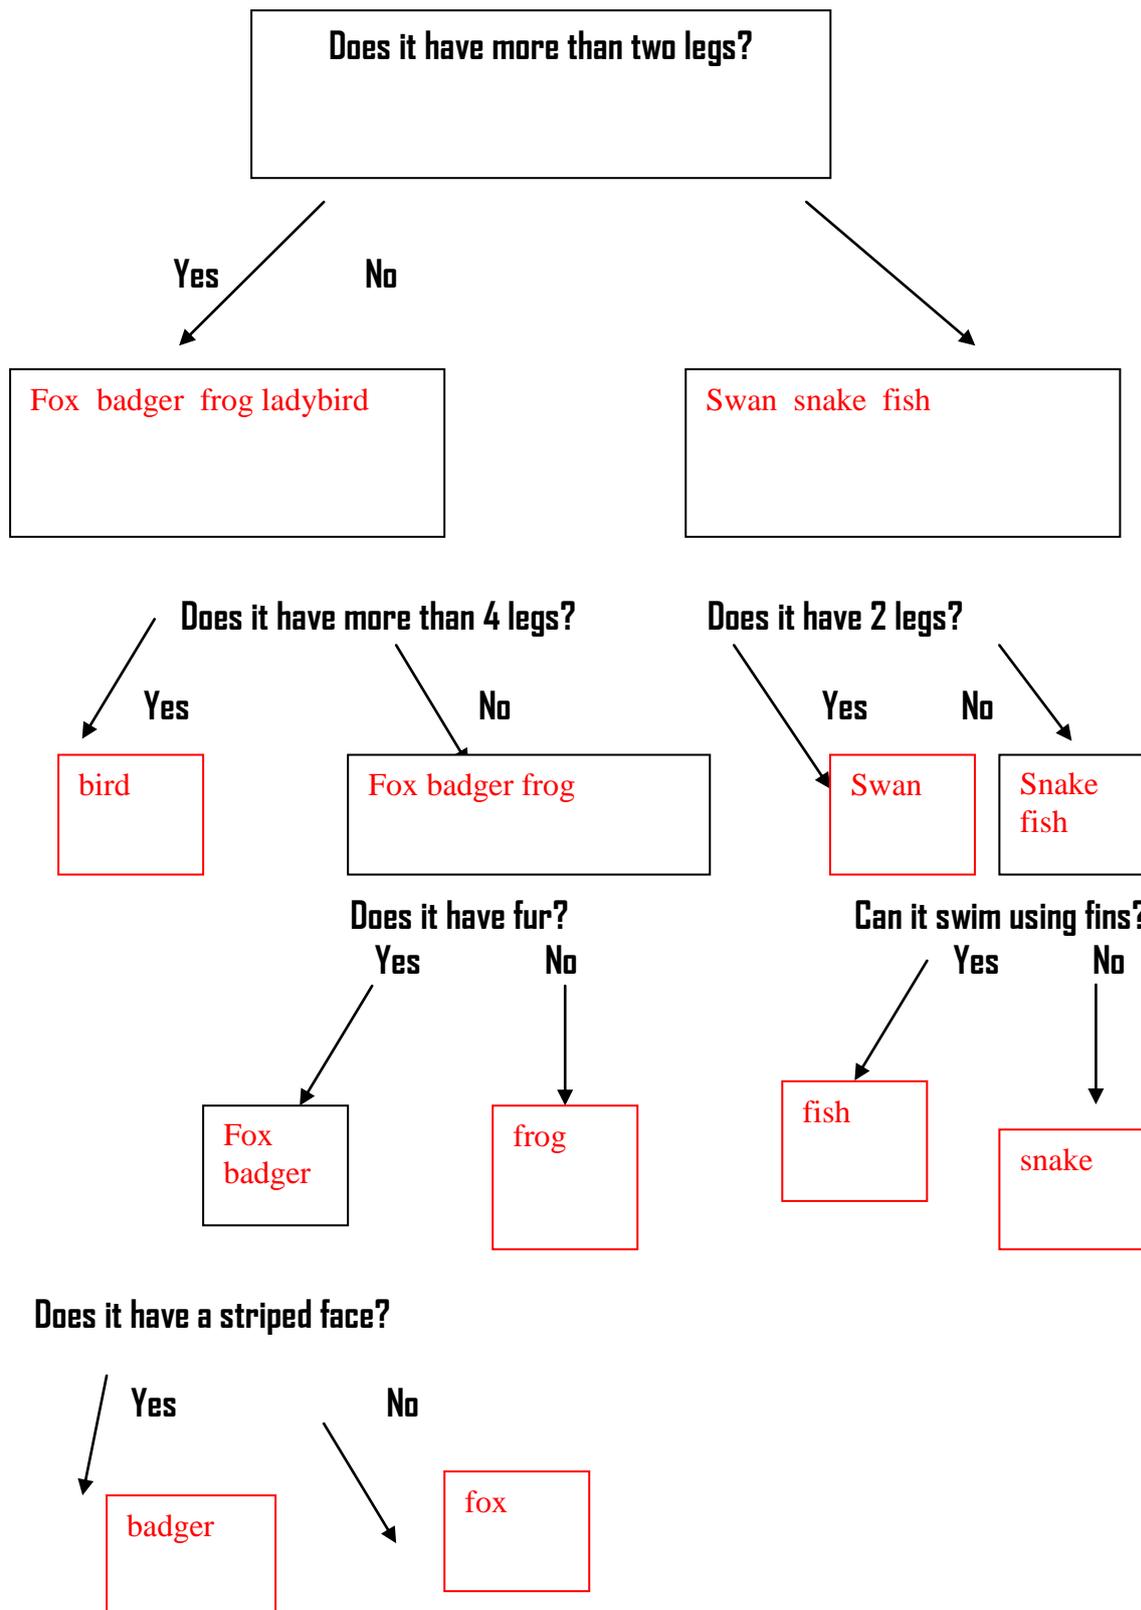

The frog is an **amphibian**.

The other animal is a **fish**. Its body is covered in **scales**.

Can you sort the animals using this box system?

Put each of the animals into the right boxes.	Has fur/hair	Does not have fur/hair
Feeds babies on milk	<b>badger, fox</b>	<b>swan, adder, ladybird, frog, fish</b>
Does not feed babies on milk	<b>swan, adder, ladybird, frog, fish</b>	

Now try to sort the animals using this key:

You should end up with one animal in each of the red boxes. © Durham Badger Group 2009
